Reference to CEFR. CEFR stands for **Common European Framework of Reference for Languages**, - a widely used international standard for describing language proficiency. It provides a framework for assessing and describing language learning, teaching, and assessment. The CEFR uses a six-level scale (A1-A2, B1-B2, C1-C2) to categorize language ability, from beginners to advanced levels.

C2	Can understand with ease virtually everything heard or read. Can express him/herself spontaneously, very fluently and precisely, differentiating finer shades of meaning even in more complex situations.	
C1	Can understand a wide range of demanding, longer texts, and recognize implicit meaning. Can use language flexibly and effectively for social, academic and professional purposes. Can produce clear, well-structured, detailed text on complex subjects.	
B2	Can understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his/her field of specialization. Can interact with a degree of fluency and spontaneity that makes regular interaction with native speakers quite possible without strain for either party. Can produce clear, detailed texts on a wide range of subjects.	
B1	Can understand the main points of clear standard input on familiar matters regularly encountered in work, school, leisure, etc. Can deal with most situations likely to arise while traveling in an area where the language is spoken. Can produce simple connected text on topics which are familiar or of personal interest.	
A2	Can understand sentences and frequently used expressions related to areas of most immediate relevance. Can communicate in simple and routine situations about familiar things. Can describe in simple terms aspects of his/her background, immediate environment and matters in areas of immediate need.	
A1	Can understand and use familiar everyday expressions and very basic phrases. Can introduce him/herself and others and can ask and answer questions about personal details.
